SUMMARY

As a forward-thinking Front-End Developer, I thrive on building engaging, responsive, and performance-optimized web applications. My technical toolkit includes HTML, CSS, Bootstrap, Tailwind, JavaScript, and React.js, which I use to transform creative concepts into smooth, interactive user experiences. I enjoy collaborating with teams to solve design challenges, improve usability, and ensure flawless implementation across all platforms. I'm constantly learning and experimenting with new technologies to push my skills further. My mission is simple — to create modern, intuitive, and visually compelling web experiences that make an impact.

EDUCATION

- Bachelor of Computer Applications (BCA)
- CGPA:7.083
